The President  
The Whitehouse  
Washington, D.C. 20500

Dear Mr. President:

We believe organic labeling is very important and urge you to see that it is preserved. We object to the following:

1. Total government control
2. Outlawing higher standards
3. Allowing factory farming
4. Fees for government certification and/or residue testing

We trust you will honor our request and see that organic labeling is preserved.

We are very much interested in this area as a distributor of organic food and from time to time sponsor educational program on the benefits of eating organic food.

Sincerely,

Port Washington Twin Pines Consumer Assn, Inc.

*Cecil Pregel*  
Secretary
